MINNEAPOLIS--(BUSINESS WIRE)--May 15, 2018-- Northern Oil and Gas, Inc. (NYSE American: NOG) today announced that it has completed its previously announced exchange transaction with certain holders of its 8% senior unsecured notes, including the requirement to raise an additional \$140 million of new equity capital.

HIGHLIGHTS OF THE TRANSACTION

- \$497 million of existing senior unsecured notes has been exchanged for approximately (i) \$344 million of senior secured notes due 2023 and (ii) \$155 million of Northern common stock

"Completing this exchange transaction, along with the associated equity raise, is a significant step that improves our balance sheet by reducing debt, increasing liquidity and extending debt maturity," commented Northern's Chairman, Bahram Akradi. "The improvements to our balance sheet will allow us to execute on our ground game acquisition strategy and further our position as the natural non-op consolidator in the Williston Basin."

The following table sets forth Northern's capitalization as of March 31, 2018, on an actual basis, and on a pro forma basis to give effect to the exchange and related transactions.

EXCHANGE TRANSACTION

Upon closing of the exchange transaction, Northern exchanged approximately \$497 million aggregate principal amount of its 8% senior unsecured notes due 2020 (the "Existing Notes") for a combination of approximately \$344 million aggregate principal amount of second lien senior secured notes due 2023 (the "New Notes") and 103,249,915 shares of Northern's common stock. The New Notes will mature in May 2023. The New Notes will bear cash interest at a rate of 8.5% per annum, and additional interest at a rate of 1% per annum that is payable in kind (PIK), provided that the PIK interest shall cease to accrue if Northern achieves specified total debt-to-EBITDAX metrics. The New Notes are secured by a second priority lien on substantially the same collateral that secures Northern's obligations under its first lien credit facility.

In connection with the closing of the exchange transaction, Northern also closed on a \$52 million private placement of its common stock. Northern's common stock was issued at \$1.50 per share in both the exchange and the private placement, which was the same price as the public offering price in Northern's \$93.4 million

underwritten common stock offering that closed in April 2018. Together, the private placement and the public offering satisfied the closing condition under the exchange agreement that required Northern to raise at least an additional \$140 million of gross proceeds from the issuance of equity.
